

## **Retail Sales Performance Dashboard Report**

### **Project Overview**

This project analyzes retail product data to evaluate sales performance, revenue generation, and the impact of promotions, product placement, seasonality, and country of origin.

### **Key Metrics**

Total Products: 20K

Total Sales Volume: 22M units

Total Revenue: \$80bn

Average Price: \$4K

### **Insights**

- China and Bangladesh generate the highest revenue.
- Promotions significantly increase sales volume.
- Winter and Autumn drive the highest revenue.
- Aisle placement performs better than expected.
- Jackets and sweaters dominate revenue.
- Women's section contributes the most sales.

### **Recommendations**

- Increase promotions on high-performing products.
- Focus on Winter and Autumn inventory.
- Prioritize sourcing from high-performing countries.
- Expand outerwear product lines.
- Improve product placement strategies.

### **Conclusion**

Seasonality, promotions, and product category are key drivers of sales performance.
